Declaration of compliance

California Proposition 65 – Safe Drinking Water and Toxic Enforcement Act of 1986

California Proposition 65 is a state law designed to protect drinking water sources from contamination by chemicals known to cause cancer, birth defects, or other reproductive harm. Companies that sell products in California are required to inform the public about exposure to such chemicals.

California Proposition 65 is implemented through, among other things, a list of well over 1,000 chemicals suspected of being carcinogenic or toxic to reproduction. If one of these chemicals is contained in a product, the product must be labeled with an appropriate warning.

In this regard, LINNEMANN GmbH has conducted a voluntary inquiry about its supply chain and would like to inform its customers that the following substances of the current California Proposition 65 may be contained in our products:

Carbon Black, CAS: 133-86-4

- Contained in blackened plastics and elastomers
- Firmly bound, not inhalable

Nickel (metallic), CAS: 7440-02-00

- Basically contained in almost all our metallic products
- Firmly bound in material

Lead and lead compounds, CAS 7439-92-1

- Below you will find a list of products with elevated lead levels
- Firmly bound in material

According to California Proposition 65 the exposure of a substance and not the concentration in the homogeneous material is decisive for the application of a warning notice. LINNEMANN GmbH does not supply directly to the US state of California, nor can the use of the products supplied by us be predicted or evaluated. Likewise, no analyses of exposure are carried out on the part of LINNEMANN.

Therefore, the products of Linnemann GmbH are not labeled with a warning according to California Proposition 65.

LINNEMANN GmbH would like to point out that further obligations may arise for customers of products due to their use.

LINNEMANN GmbH assumes no liability for products sold into the State of California if they are not properly labeled.

The current valid list and additional information can be found on the California Office of Environmental Health Hazard Assessment (OEHHA) website.
