## Declaration of compliance Conflict Minerals – Section 1502 of the US Dodd-Frank Act.

The term "conflict minerals" under section 1502(e)(4) includes the four chemical elements **tin**, **tantalum**, **tungsten**, and **gold**, also called **3TGs**, that originate in a particular part of the world where there is conflict affecting the mining and trade of these minerals.

LINNE MANN GmbH is aware of its social responsibility regarding environment, safety, health and human rights. Even though Linnemann GmbH is not subject to the reporting requirements of the Dodd-Frank Act, a survey of the entire supply chain is carried out once a year on a voluntary basis and a **CMRT (Conflict Minerals Reporting Template)** for the previous fiscal year is made available to our customers.

Current changes in the status of smelters cannot be considered, but will be reviewed and considered in subsequent CMRT reporting.

Via the following link you can download our currently valid CMRT version 6.4.
