

Reliable components for secure process technology – LINNEMANN at ACHEMA 2015

With an updated portfolio, LINNEMANN GmbH is presenting high quality pipe connection systems and components as well as special products for process technology in plant construction. The fittings, especially disc and ball valves, can be assembled individually as part of the extended service range. One of the strengths of the company in Tuebingen, Germany, are the on-stock supplies of complete component ranges of the specific stainless steel, aluminium or glass connection systems. The company philosophy is therefore true in every detail: „Reliable components for reliable process technology“.

Typical pipe connections are

- Clamped flanges
- Pre-welded flanges
- Screw-type pipe unions
- Threaded flanges
- Pipe couplings

The certified company is exhibiting pipe connection systems according to national and international standards as well as their own developments for various media:

- Gases
- Liquids
- Bulk materials

for underpressure and overpressure plants for many branches of industry such as:

- Food
- High vacuum
- Chemicals
- Pharmaceuticals
- Cryotechnology
